

AI Tools for Productivity

The information provided in this handout is accurate as of March 2024. AI tools and their functionalities are subject to change. Please refer to the official websites of the respective tools for the most up-to-date information. This handout is for informational purposes only. The author is not affiliated with any of the AI tools mentioned, nor does the inclusion of a tool imply endorsement. The descriptions of AI tools are brief and intended for general understanding. Users should conduct their own research to assess the suitability of each tool for their specific needs. Users should exercise caution and adhere to the terms of service and privacy policies when using AI tools. Some tools may require subscription fees or have limitations on free usage.

Task/Attribute	Source	Description
